Response Rate: 7/9 (77.78 %)

3 - Please tell us more about your experience with assignments and expectations.

Response Rate	6/9 (66.67%)

- n/a
- Assignments were fun and informative. I especially enjoyed setting up MySQL and designing my own database.
- Assignments were related and aligned with the lecture topics. Use of Github classrooms for submissions is a very essential skills to develop.
- The assignments strongly aligned with course material and helped me understand this topic in a way as strong as other topics I have followed and researched for years. Full marks
- Everything was great! We had all the lectures and assignments on GitHub, which made it super convenient to keep track of everything, plus gave us a chance to practice working on GitHub as well. Also, submitting code was way easier than submitting zip folders on Canvas. The professor did a really good job!
- I feel like the assignments were very relevant to the current industry expectations.

4 - Please tell us your experience during the hands on activities. Hands on activities (Active Learning) can include activities during your lecture/theory course (case studies, group work, etc.), clinical experiences, lab activities, or during your practicums. If your course did not involve any activities, please mark N/A.

The directions and/or safety rules were reviewed prior to the activities

Response Option	Weight	Frequency	Percent	Percent Responses	Means

Lake Washington Institute of Technology
Fall 2025 Course and Instructor Evaluations

Course: CSD33125532: CSD331 25532 - F25 - Database Modeling&Design-Section 25532

Instructor: Vishesh Khemani *

Response Rate: 7/9 (77.78 %)

5 - Please tell us more about your experience with the hands-on activities.

Response Rate	6/9 (66.67%)

- n/a
- Quickly formed group activities were conducive to keeping the flow of the class sessions going. I especially enjoyed using "Socrative".
- Were expected and challenged to be active and participate during class lectures. This was facilitated through quizzes and class discussions of covered topics.
- The group projects weren't the most organized thing I've ever seen, but it did something more important. By using git and industry relevant technologies, I got to see what working in an actual team on an actual problem looked like, mess and all
- We had some in-class activities where we had to either think of solutions in pairs or individually, and the Professor also created an online poll for us, so we could better understand the material.
- The hands-on activities were the in-class tests, home assignments, and short interactive tasks that went along with the lecture. Everything was connected to the studied topic.

6 - What aspects of the course contributed most to your learning?

Response Rate	7/9 (77.78%)

- in class discussion and quizzes
- Feedback on homework + in class going over the homework
- Lectures and assignments.
- The class lectures and the discussions it provoked between us students and the lecturer. Professor also shared tales from his time in the field that were very poignant to the discussions and topics covered in lectures.
- The professors passion for both teaching and the subject matter shine through to the class itself, and made learning about the subject (even for someone like me who didn't have a ton of previous experience in the subject) easy and rewarding.
- The very well-written lectures by the professor. He wrote all of them by himself and explained everything in a very clear way. He was also walking us through homework solutions, explaining the best ways of doing it.
- Home assignments - they gave me a chance to apply what was taught in the lectures.

7 - Overall, this course has been effective in advancing my learning.

10 - Please tell us more about your experience with the instructor.

Vishesh Khemani

Response Rate	6/9 (66.67%)

- Great experience, no complaints. Explains topics thoroughly.
- Professor Khemani is one of the best instructors I've had at LWTech. I really feel fortunate to have someone so knowledgeable and committed to teaching for this course.
- Lectures were very organized and he encouraged discussion and active student participation during all lectures. Quizzes were aligned with the covered topics in lectures. Using Github classrooms for assignment submissions is a very important skill as for a CS major. The group assignment really allowed me to engage in collaboration and learn from my peers.
- I haven't had an instructor who made me feel as excited for learning as this one in a long time. I didn't have as much experience when it came to data science but already knew the practicality of the subject matter and how it could be applied to my life. The instructor took that and made me feel like an expert in the topic, while also helping me form connections to both what I may want to use it for in my personal life and how it can be used in a workplace environment. It's too bad I couldn't give higher marks to some of the checks above, as there hasn't really been a college class environment I felt more comfortable engaging in that I remember. Full marks
- Vishesh Khemani is one of the best professors I have had so far! He is very polite, always ready to help, adjusted office hours for us, making the timing super convenient. He was super fast in responding to emails. He knew everyone's name. You can tell that this professor really enjoys the process of teaching and puts a lot of effort into teaching us something new. I really appreciate his help and support during this quarter. I really hope we will have more classes with him in the future since his teaching style definitely helps to learn the new material!
- This is a very good instructor, I would take more of his classes.
