• For the most part, assignments / tests cover material we talked about during class. But once every couple of weeks there will be an assignment or quiz about a topic that wasn't covered enough in the lecture.

• They were clear, and good, Though I do wish they were put out earlier in the week for previewing or if anyone wants to get ahead. It is very hard to "get ahead" in this class and that makes it difficult to pace assignments from other classes with this class. Additionally, I felt like the Discussions for the class were extremely unnecessary as most of the time you could tell people were either replying to get the points.

• It was hard to understand the expectations of the assignments, projects, and discussions. Also not all the information was provided in the class previous to the assignments and projects. Due dates for some assignments and projects overlapped with tests which left little time to study or prepare for the exam.

• The python computer networking final felt disconnected from things we were learning in class, I like the hands on assignment but its tough to translate the concepts we learn in class to hands on experience. We had a few assignments/experiments of working on the topics hands on like wireshark/etc., but they felt few.

- N/A
- The activities allowed for a nice break from the constant lecturing allowing for some of the students to assimilate what had just been said. It also allowed the classroom peers to interact in a more casual setting, making a welcoming classroom environment.
- Very confusing directions about what exactly to do.
- I found the hands-on demos in class to be a great way to better understand the concepts.

• Vish is very knowledgeable and it shows through the different "tales from the trenches" as well as when you ask a question, he generally knows the answer and how to phrase the concept in a different way and input his own take on it as well.

• Vishesh was an awesome instructor. I think this is the first time I've been able to choose 'Strongly Agree' for every category for an instructor. Vishesh knew the topics he was teaching deeply, and could consistently answer questions beyond a surface level. He came to every class well-prepared and experimented with different teaching techniques. He was clearly committed to helping students succeed. Considering it was his first quarter teaching, I'm impressed. LWTech better keep him around.

• Did not respond to emails. Timed tests for less than an hour. Did not take in account circumstances that are sometimes out of hands. No opportunities for extra credit, instead he gave us more work and he called "Optional ungraded assignment" which was not really optional because we had to do it in order to be prepared for the Final.

• I thoroughly enjoyed Vishesh's teaching style, as it made the concepts easy to understand.
