3 - Please tell us more about your experience with assignments and expectations.

Response Rate	5/11 (45.45%)

• The time requirements for each assignment have varied wildly from week to week. Some weeks, the assignment can be done in 30 minutes. Some weeks, it takes a couple of hours. It doesn't follow any linear pattern: such as assignments getting slightly more difficult as the weeks progress. The assignments that involve multiple-choice or short-answer questions will sometimes cover topics that were only briefly mentioned in the lectures or the accompanying slides.

• Assignments have a good level of expectation that is a good balance between redundant extra work, over bearing long hours of work, and too easy super short amount of work.

• Assignments were a reasonable balance between working on the assignment through other classes and a full-time job for me. I appreciate the assignment load being a manageable amount for myself in case I had other life events getting in the way of me.

• Assignments were well structured and simple enough that it didn't take a lot of time out of my day, but still re-enforced my learning. The only issue I did have was that some assignments only focused on a specific part of what was taught, and then when I came into class the next week for the quiz my learning hadn't been re-enforced for the specific question being asked, leading to confusion.

• The assignments, quizzes, and classes in general were synchronized and easy to understand.

5 - Please tell us more about your experience with the hands-on activities.	
Response Rate	4/11 (36.36%)

- N/A
- In class lectures were well structured and any work done in class had reasonable meaning to diver deeper into.
- Do wish there was something like a hands-on activity but its fine that there wasn't.
- Enhance my understanding and also help me see how this applies to the real world.

6 - What aspects of the course contributed most to your learning?	
Response Rate	5/11 (45.45%)

- The lecture and slides.
- Vishesh is a great teacher, he's able to connect lectures to his real world experience in a way that makes the content engaging and meaningful.
- The lectures were rich with information and allowed me to take extremely detailed notes on the topic being discussed on the day.
- The calm and chill nature of Vish's class is really helpful for alleviating stress and helps me learn what's being taught instead of worrying that I have to cram this in for an exam.
- The assignments and the quizzes

7 - Overall, this course has been effective in advancing my learning.

• He's still pretty new at this job. But overall, I think he's doing a good job. I enjoy his classes, even if sometimes he spends too long on some topics and too little on another. He's knowledgeable and enthusiastic.

• Amazing instructor. Instructors who are this competent & really care about their students success are rare. I wish Vish taught at LWTech earlier so I could've had him as an instructor for my other classes.

• I am glad he has been added to LWTech's pool of teachers, in the CSD Bachelor he has been my favorite instructor so far to learn from!

• I throughly enjoyed Vish;s teaching style and I would further enjoy taking more courses with him if I could.

• I have been in Vishesh's first two classes and I enjoyed him as a professor with them a lot! I appreciate his enthusiasm to teach and help with projects and assignments, and see how much he's improved in two quarters.

• Vish is a wonderful person to work with and really cares about his students learning. As a new teacher, he has done exceptionally well navigating the differences between teaching in front of students versus doing something like a webinar. Additionally, he is always looking to improve and students feedback's are always considered. I believe with students who help him to grow as a teacher he will become an invaluable asset to the CSD bachelors' program, both with his passion to teach and for students to learn and his wide knowledge of different areas having worked in the the field.

• It was helpful to hear about the real-world experiences that the professor shared with us and how they apply to what we learned.
